

**Confederated Tribes of the Umatilla Indian Reservation
Department of Natural Resources—Fisheries Program
Pacific Lamprey Research and Restoration Project**

PROJECT WORK PLAN

A key component to restoring lampreys to the Umatilla River as outlined in our approved restoration plan titled, Restoration Plan for Pacific Lampreys (*Lampetra tridentata*) in the Umatilla River, Oregon, is to collect adults for outplanting in the Umatilla River Basin. CTUIR proposes to collect up to 289 adult Pacific lamprey from staff that are trapping lamprey at Bonneville. CTUIR staff would come to Bonneville Dam and pick up adult lampreys from the AFF traps. We will insure timely pickup times to not exceed the 48 hour maximum holding time in the AFF holding tanks. Upon USACOE approval, CTUIR anticipates beginning this collection in May 2015 and continuing until last week of September or until target is met, whichever is first. We would utilize our 300 gallon fish transport tank for moving adults on and off the project. CTUIR has permitting to collect adult lampreys at the project. FPOM already approved this work 2010-2014 and we request approval for 2015. CTUIR would work with other tribes to help facilitate their perspective collections as well.

PROJECT IMPACT STATEMENT

CTUIR has no anticipated impacts to the existing project activities. Measures will be taken to assure project safety.

JOB HAZARD SAFETY ANALYSIS

See attached Job Hazard Safety Analysis sheet.

MATERIAL SAFETY DATA SHEETS (MSDS)

No hazardous materials will be brought on site for this activity.

FUNDING ARRANGEMENTS

No project support will be necessary to perform job activities.

PERMITS

CTUIR Lamprey Project has a permit for collection issued from the CTUIR.
