Re: WDFW Access to the John Day Project

Dear Kevin,

The purpose of this letter is to request continued access to the John Day Project in 2016 in order to conduct hook and line removals of predatory northern pikeminnow from the Boat Restricted Zone(s) adjacent to the project. These activities are part of the ongoing Columbia River Predator Control Program (Pikeminnow program) funded by the Bonneville Power Administration, and administered by Mr. Steve Williams at the Pacific States Marine Fisheries Commission (PSMFC). These activities have been annually conducted since 2010 by Washington Department of Fish and Wildlife (WDFW) technicians under my supervision as the WDFW Project Leader. The COTR for this project is Mr. Dave Roberts at the Bonneville Power Administration (Contract # DE-B179-90BP07084).

Access for 2016 is requested to the same areas of the John Day Project, during similar times, and for similar duration as was granted to WDFW for these activities in 2010-2015. We hope to implement these activities during the period of approximately 5/1/2016 through 10/15/2016, or until project objectives are met, whichever comes first.

We have reviewed the current Access Guide for JDA and can provide any required pre-project documentation needed of researchers working at the John Day Project. This documentation will be provided to Ms. Tammy Mackey and/or the Project Biologist as needed so as to ensure that all approvals, trainings, and/or clearances are in place prior to commencing any activities. Thank you for considering this request for project access.

Sincerely,

Eric Winther
WDFW Project Leader
