MEMORANDUM FOR THE RECORD: 21 LGS 09 Unit Priority

SUBJECT: Emergency Outage of Unit 1 for Troubleshooting

Background

Unit 1 was taken out of service for approximately three hours from 11:00 to 14:05 on 28 July 2021. As stated in the fish passage plan, Unit 2, the next highest priority unit was operated for adult fish attraction during the outage. This emergency outage allowed for troubleshooting to determine what caused the unit to suddenly trip offline on 27 July 2021. The outage was crucial to diagnose the issue before more trips and/or possible damage occurred to the highest priority fish attraction unit. The unit was returned to service at 14:05 on 28 June, immediately following inspection and necessary data collection.
