

OFFICIAL COORDINATION REQUEST FOR NON-ROUTINE OPERATIONS AND MAINTENANCE

COORDINATION TITLE – 20WVP03 Changes in 2020 Willamette Basin Mitigation Trout Releases

COORDINATION DATE – January 17, 2020

PROJECT – Mitigation Trout Contract

RESPONSE DATE – 04 February 2020

Description of the problem – The Oregon Department of Fish and Wildlife (ODFW) is requesting a change in the Mitigation Trout Contract between Desert Springs Trout Farm (DSTF) and the US Army Corps of Engineers (USACE) to include specific release numbers and dates for waterbodies to receive fish. This detail was missing from the original contract between USACE and DSTF and is needed to allocate mitigation trout in a manner consistent with ODFW management priorities for Oregon fisheries and anglers. Additionally, ODFW, USACE and the McKenzie River Guides Association (MRGA) have corresponded about the desire to provide in-basin reared hatchery trout for releases in the McKenzie River. In November 2019, ODFW provided a schedule of releases for the 277,000 pounds of trout reared and released by Desert Springs and a copy of that schedule is attached to this document.

Type of change required – Exchanging the contracted schedule of releases for the attached schedule of releases.

Impact on facility operation - This change will require a no-cost contract modification and as such, will not require additional funding.

Dates of impacts – February 2020 through December 2020

Length of time of the impacts – A schedule of release numbers and dates will be resubmitted for 2021 after the 2020 releases are made and the results of the subsequent fisheries are assessed

Analysis of potential impacts to fish

1. The proposed changes in the release schedule for mitigation trout will not have a non-authorized effect on ESA listed spring Chinook, winter steelhead or bull trout in the Willamette River Basin.

Summary statement - expected impacts on the fish/program :

- 1) The schedule of releases for the 277,000 pounds of trout reared and released by Desert Springs will provide Oregon anglers fishing opportunities consistent with ODFW fish management priorities.
- 2) Mitigation trout from DSTF will not be used for releases into the mainstem McKenzie River and Leaburg Lake.

Comments from agencies and the contractor

DSTF agreed that the proposed schedule from ODFW (attached below) can be accomplished as a no-cost contract modification in a letter received by the USACE on January 6, 2020.

ODFW supports the proposed schedule of releases as our preferred action to provide mitigation trout for Oregon anglers.

NOAA approved the schedule of release locations and numbers in a letter to ODFW dated December 23, 2019.

18 February 2020 0900 call with Bruce McIntosh (ODFW), Lance Kruzic (NOAA Fisheries), Tammy Mackey, Chris Walker, Bob Wertheimer, and Ian Chane (NWP). This call was to address the concerns and comments expressed in the email below (NOTE: email has been truncated to only include the trout stocking related information).

During the call Lance commented that trout stocking in water bodies that do not have an ESA concern wouldn't be limited by the HGMP. Tammy noted that approved HGMPs are new for the Corps and we are working through how best to coordinate changes and deviations within Portland District. She noted that she shares Bruce's recollection of Kevin Brice deferring to the fish managers on stocking, however, she suggested that deference was with the understanding that we would stay within the limits of the HGMP and BiOp. She explained that she needs time to inform upper management before changes are made, not after the fact. She also explained that it should be NWP requesting concurrence from NOAA Fisheries regarding changes to HGMP/BiOp requirements when those changes affect NWP contracts and/or contractors. Bruce and Lance both agreed that coordination with NWP is still new and everyone committed to continue to work together. Tammy suggested that after talking with upper management the week of 24 February, it is expected that the remaining stocking schedule could be modified to reflect ODFW's requests. February is nearly over so we would be looking at March through the rest of the year.

Below is a table showing the original HGMP pounds, the new HGMP pounds, and the ODFW requested stocking.

Subject: [Non-DoD Source] RE: Leaburg fish trap (UNCLASSIFIED)

Hi Tammy,

I will address the questions around the trap, trout stocking, and spring Chinook releases in Little Fall Creek individually. I have cc'd Lance on this to get his perspective on expectations and direction.

Trout stocking and management in the Willamette:

* Several years ago, ODFW and Corps brass met to work through the issues around trout contracts, production and management and come to mutual understanding of the path forward.

* The Corps (Kevin specifically) committed during the meeting that the Corps would defer to ODFW's authority when it came to fish stocking dates, numbers and waterbodies consistent with HGMPs. We are concerned that it really has not worked out that way.

a. Stockings were changed significantly from what ODFW asked the Corps to contract for (McKenzie for the most part), departing from a long-standing program that did not work for the public or ODFW. We have collectively spent a bunch of time trying to resolve this since last year and thought we had a solution to learn at the 11th hour the Corps was not prepared to support it. None of us has the time it takes to put into this if the goalposts keep moving. We need to do better and work to resolve this ASAP.

b. The Corps has pulled stocking of ponds that are part of the program and non-ESA. It is not clear to us if this was an oversight on the Corps part or an explicit action. Again, I reference Kevin's commitment to deferring to ODFW on trout stocking and management. Would you please explain what has changed here?

Glad to have a follow-up conversation with all of you on this so we can keep this moving forward.

Thanks in advance, Bruce

Table 1. HGMP pounds and ODFW stocking request.

Waterbody	HGMP (2018) lbs	(e-mail HGMP) lbs	ODFW Proposed 2020 Stocking Schedule, lbs (USACE funded, Desert Springs)
Alton Baker Canal	15,000	25,000	15,900
Breitenbush River	6,700	6,700	5,250
Detroit Reservoir	59,000	59,000	37,600
Dexter Reservoir	10,000	15,000	12,540
Fall Creek above Reservoir	5,000	5,000	4,500
Fall Creek Reservoir	5,000	7,500	4,100
Foster Reservoir	16,000	16,000	16,000
Hills Creek Reservoir	30,000	30,000	10,000
Leaburg Lake	10,000	10,000	0
McKenzie R above Leaburg Dam	25,000	25,000	0
McKenzie R below Leaburg Dam	15,000	15,000	0
Salmon Creek	7,000	7,000	4,825
Santiam R, N Fk, Above res	12,000	12,000	9,900
Silver Cr Reservoir	6,500	6,500	0
Trail Bridge Reservoir	5,000	10,000	0
Willamette R, Cst Fk	2,500	5,000	3,150
Yamhill River	1,000	1,000	0
	red: deviation from 2018 HGMP		

Final coordination results

The schedule proposed by ODFW was implemented the week of 09 March 2020 after award of the contract modification. The table below initially was going to be incorporated into the Willamette Rainbow Trout HGMP. The USACE proposed another table similar to below (attachment 1) that included all waterbodies where trout stocking occurs for USACE mitigation. The HGMP will be updated by NMFS (Kruzic).

Table 10.1-1. Maximum pounds of trout released into ESA-listed fish waters, annually, 2020 and beyond. This table refers only to trout being planted into ESA-listed fish waters. ODFW's stocking schedule includes waters outside the ESA-listed fish waters which are not listed here and are not relevant to this HGMP.

Waterbody	Pounds of trout
Alton Baker Canal	25,000
Breitenbush River	6,700
Detroit Reservoir	59,000
Dexter Reservoir	15,000
Fall Creek above Reservoir	5,000
Fall Creek Reservoir	7,500
Foster Reservoir	16,000
Hills Creek Reservoir	30,000
Leaburg Lake	10,000
McKenzie R above Leaburg Dam	25,000
McKenzie R below Leaburg Dam	15,000
Salmon Creek	7,000
Santiam R, N Fk, Above res	12,000
Silver Cr Reservoir	6,500
Trail Bridge Reservoir	10,000
Willamette R, Cst Fk	5,000
Yamhill River	1,000
Total	255,700

Please email or call with questions or concerns.
